ARE WOMEN LESS UP-TO-DATE

THAN MEN?

The modern business man spends hundreds and thousands of dollars for Labor-saving Devices to make his work easier and to enable him to accomplish

more.

The average housekeeper is doing her work as her great-grandmother did it; and the reason her work is never done is that she does not use modern means for doing her work.

The greatest invention of the age for women is the

"1900" Electric Washing Machine. Every woman in Edmonton who is using this machine will vouch for this statement, yet there are many many women in the statement will handle their back over a contract the statement. Musical Reciprocity Around the Empire.

"Musical Reciprocity around the Empire is three fold in its mission, namely: Music-making, Business-making and Empire-making. As regards Music-making, it appeals to the sympathies and stimulates the senses. As regards Business, it induces a body of business men, through, a love of music to travel the Empire, there to discuss with the boards of tradegard chambers. of commerce speedier means of trade expansion between the Mother Country and her Overseas Dominions. As concerning the Empire, Musical Reciprocity enables us to get into touch with our kith and kin of the new worlds; and our pilgrimage through the respective countries of Canada, Australia, New Zealand, Tasmania, and South Africa, reveals to us our Empire as it really is. On our return to England we preach the gospel of Empire Joy publishing the boundless resources and ambitions to be found within Britannia's bulthe bolumines resources and amountons to be round within Britainia's built warks overseas. Thus is the message borne to our children's children, and through them to our children's children, to the third and fourth generation. Musical Reciprocity is derrived from thin air, yet it is filling ships to-day with hundreds of live freight, bent upon knowing the Empire—a noique and undensities of the property of the pr able fact. Now the businessman—the man who cares nothing for music, and there are muny such all over the world—puronizes to day, the music festivals we make all around the Red Boute, because, for the first time in the history of Christendom, music becomes a business factor. This is accomplished through the advertising of the Overseas Dominions by two hundred self-appointed agents, who, after having seen their inheritance under the banner of Musical Reciprocity go forth to lecture throughout the homeland on the wonders they have seen. This costs the Oversens Dominions nothing, consequently I affirm it is a good business, such as the hard dollar and cent men readily appreciates; for live advertising is what the younger countries
